

Blue Horizons

Aqua Sparkle Tablets

Key Features

- Enhances filter efficiency
- Add weekly for sparkling water
- 50g floc tablet

Blue Horizons Aqua Sparkle Tablets are designed to assist the filter in removing small, suspended particles to ensure sparkling clear water.

Application Instructions

1. Maintain pH levels within the ideal range of 7.2 – 7.6. Adjust if necessary.
2. Maintain total alkalinity within the ideal range of 80 – 150mg/l. Adjust if necessary.
3. Maintain free chlorine levels within the ideal range of 1 – 3mg/l. Adjust if necessary.
4. Backwash the filter, then return to normal filter cycle.
5. Ensure the skimmer basket is clean and free of any other chemicals.
6. Add 1 tablet to the skimmer basket per 40,900 litres (9,000 gallons) of pool water per week.
